

CAROLE J. WACEY

President & CEO

Carole Wacey joined Women Creating Change as President and Chief Executive Officer in November 2017. From the outset, she has been focused on evolving WCC to be inclusive, impactful, relevant, and innovative.

Carole undertook an intensive strategic planning process--assess WCC's history and identify opportunities to meet the needs of an evolving City at this point in our nation's history. Carole has led a comprehensive planning process that has included a historical review, surveys of membership, meetings with key partners (past and prospective), and plans to launch our strategic plan in the fall of 2018.

Carole Wacey served as Vice President, Education at WNET since December 2012, where she focused on technology, interactive media, youth development and underserved youth.

Carole served for ten years as Executive Director at MOUSE, a national nonprofit organization that empowers underserved youth to learn, lead and create with technology. She will continue to support MOUSE as a recently elected member of its Board of Directors.

Prior to joining MOUSE, Carole was the Director of the Interactive Media for Children program at the Markle Foundation. Under her leadership, the IMC program worked to help realize the potential benefits of interactive media for children by building partnerships between industry, the academy and consumers.

Before joining Markle, Carole was Deputy Director of the Office of Education Technology and Senior Policy Advisor at the U.S. Department of Education. In that capacity, she provided leadership for the Clinton Administration on the development and implementation of national educational technology policy and program development. She addressed issues such as telecommunications, the digital divide, Internet safety, privacy, and e-commerce.

Carole, a Queens resident, received her B.A. in Economics from the American University, and her J.D. from Vermont Law School. She has also studied public international law at Oxford University, and Leadership at Yale University. Carole was elected to the Board of Directors of MOUSE.
